

G30033 Blood pressure monitor |

► DESCRIPTION

Arm digital sphygmomanometer for self-measurement of systolic and diastolic pressure, tested and clinically validated, with a large LCD screen that allows facilitated reading for elderly. Fully automatic operation, this unit is very easy to use and turns off by itself once finished or in case of long inactivity to preserve battery life. This machine is capable of recording up to 120 memories for 4 different users (30 for each user), creating data stores which can be easily consulted by date, time and media measurement, to always keep an eye on your blood pressure.
