

G90011 PULISCO | CYCLONE VACUUM CLEANER

► DESCRIPTION

Compact and easy to store, the PULISCO canister vacuum cleaner is also easy to drive in small spaces. Ideal for those who suffer allergy and asthma to maintain a clean and healthy environment, this unit is equipped with a double HEPA filter to capture even the smallest particles that otherwise could not be trapped by traditional vacuums. Thanks to the Cyclone system with an excellent suction force of 15 kPa, you can collect dust, dirt, crumbs and debris with a single movement, which, combined with low energy consumption (Class A), will help you save time and energy (25,6 kWh/year). In addition to the traditional floor brush (for both hard surfaces and carpets), the accessories supplied include the multifunctional brush nozzle, a perfect solution for cleaning hard-to-reach areas such as corners and slots between furniture.
