

G10117 Galaxy | ELECTRIC HOTPLATE

► DESCRIPTION

GALAXY is a glass-ceramic electric hotplate, powerful and with many usage possibilities. In few time, 15-20 minutes, it will boil 3 liters of water and thanks to the 6 levels of temperature that can be set it can be used to cook, heat and prepare many recipes. Thanks to the high power it will also be possible to fry outside, in order to avoid bad smell in the house. It is conform to all current safety regulations, and is also energy-saving compared to the traditional hotplates.
