

## G20111 RiberaPro | CITRUS JUICER

### ► DESCRIPTION

Our juicer Ribera Pro is suitable for all-family use and, thanks to its powerful 350 watt power motor, it provides the power to quickly and easily extract all citrus juice. Equipped with a double juicing cone you can squeeze directly into the cup any kind of citrus with maximum efficiency: the large cone is ideal for grapefruits and oranges, while the small is suitable for lemons and limes. The special arm allows you to fasten the citrus and exercise the right pressure to obtain a perfect juice as in your favourite bar while the pulp collects in the removable filter during juicing. Featuring a modern stainless steel body, Ribera Pro is completely removable for an easy cleaning.

### ► TECHNICAL FEATURES

- |                                       |   |
